Together

## **Generations Together Shaping Futures Event**

**Town Hall, Lerwick, Shetland, Tuesday 23 April 2013**

### **Feedback from the session:**

- Check that our policies, SOA has the term 'Intergenerational Practice' in them and drive this forward if not! Useful to have the guidelines
- I will use the information I have learned today to signpost people to intergenerational projects locally. Thank you.
- Good to see the displays of current projects. More please!
- I will use the information contained in the Guidelines booklet to inform funding applications and project proposals in the future.
- As Dementia Advisor, I am intending to develop Intergenerational Activities – there is already a knitting group and a Dementia Cafe. This has been useful in identifying outcomes.
- Take it back to the unit and try to organise more joined up work with schools.
- Already been thinking about working across generations and involving young Looked After Children and Young People leaving care and intend progressing.
- Refer people to website.
- Practical related to Policy. Examples of existing projects. Next steps: Consider Case Study for Education Group. Talk to Authority about CPD (In Service).
- Useful. Want to link it to Curriculum for Excellence. Does it have to be projects – can it be an intergenerational society (an island)?
- Won't put the document on the shelf!
- Use to assist voluntary organisation with funding applications.
- Use the Guidelines to complete project application documents, and also build project ideas around National policy.

- Really interesting and some of the projects were so inspirational! As Lead Officer for the 'Safer' strand of the SOA I shall revisit it to see if any IP projects can be incorporated
- I will use the information contained in the Guidelines booklet to inform funding applications and project proposals.
- It was useful to see project examples.
- We may be more able to comply with Scots Gov demands to box tick.
- Found today useful going into more discussion on Intergenerational Practice. I would like to use this document by taking this back to the rest of the team, how we can strengthen community bonds with young people and all ages.
- Plan to take the guidelines to my management team and cascade and share with my peers and look at in the context of our draft SOA.
- Good to have time out and work with a new publication. More real than just an e-mail attachment.
- Good to meet such a wide range of people interested in this area of work.
- Take the guidelines doc back to Active Schools Team meeting (Sport & Leisure SIC). Discuss with the management teams in my school cluster.
- Why was intergenerational practice not included with the policy framework in the first place?
