13. The success of an intergenerational activity depends, in part, on youth and older adult participants' observable social behaviors. Which behavior was most common among the majority of participants during the activity? Answer separately for youth and older adults.

Youth participants (circle one behavior)

Solitary: engaged in an activity without observing, responding to or interacting with others.

Watching: observing, without engaging in the activity or interacting with others.

Intergenerational Interactive: responding to, communicating with, or interacting with 1 or more intergenerational partners.

Older adult participants (circle one behavior)

Solitary: engaged in an activity without observing, responding to or interacting with others.

Watching: observing, without engaging in the activity or interacting with others.

Intergenerational Interactive: responding to, communicating with, or interacting with 1 or more intergenerational partners.

14. Which face describes the predominant mood of:

- a. Youth participants: \_\_\_\_\_  
b. Older adult participants: \_\_\_\_\_

**Facilitator notes.** Reflect on aspects of the activity not captured above. If you're familiar with the intergenerational activities, reflect on changes you observed, such as indication of developing intergenerational relationships. Reflections may spark ideas for improvements, activities, or ways to demonstrate impact.
